

18 Month Well Baby Developmental Flow Chart

Community services work with primary care providers to assess growth and development, provide support and education and connect families to resources.

Nipissing District Developmental Screen

A parent survey tool to understand and review child development at various ages.

Rourke Baby Record

A tool for physician/nurse practitioners to monitor the child's first 5 years of development.

Goals of the 18 Month Visit

- Monitor growth and development of child using the Nipissing District Developmental Screen and the Rourke Baby Record.
- Address parental concern about healthy child development and behaviour.
- Provide information about parenting and other community programs that promote healthy child development and early learning.
- Refer to specialized services when needed so children have access to interventions as early as possible.
- Develop effective partnerships amongst parents, primary care providers and community services.
