

Let's Get Started Programs: Fall Calendar 2012

The Let's Get Started program model emerged as a response to address the long waitlists for individualized diagnostic and intervention services for preschool children who have been identified with developmental concerns.

The Let's Get Started is a **FREE** program that brings together health and social services to deliver an accessible 6-8 week parent-child social play group programs that respond to families' immediate practical parenting and child development needs. The learning opportunities and materials are tailored to the individual needs; parents/caregivers are encouraged to actively participate in play activities while staff model play based learning strategies.
